Winter 2019

Dear _____,

We are a group of local citizens who have come together at Mendocino College to help develop a sustainable and just economy in Mendocino County. We are mapping businesses, nonprofits, government agencies, and citizen groups that create an economy that is good for both people and nature. Over 200 entities will populate our map and your organization has been identified as one of them.

This is part of a national effort to map all of the organizations that are helping to build an economy for the future. The national Solidarity Economy Network (SEN) brings all of these groups together across the country. (The SEN map may be viewed at <http://solidarityeconomy.us/>.)

For the purpose of putting you on the map, we have gathered the information from your website and other sources to answer many of the questions on our attached questionnaire. Please review the data we have collected and let us know if you would like us to make any corrections or additions. We would also appreciate it if you would answer any questions that we have not completed. We will give you a call in a couple of weeks. Our map, to date, can be viewed by clicking [here](#).

We look forward to your participation in this project. Let us know if you have any questions or thoughts on this effort.

Keep up the good work!
